Field No	Spotted by	Name	Field IDs by	Fungus with or ID confirmed by	Substrate e.g wood or soil	Associated organism e.g Eucalyptus or Callitris	Notes		
001	RJB	? <i>Hygocybe sp</i>			Soil	Eucalypt verging into rainforest	Yellow cap d 25mm Gills wide, thick yellow,sldec Stipe hollow fibrous		
002	NB	<i>Marasmius sp</i>			Dead wood	Eucalypt area	Gilled Pale fawn darker centre cap, dark stip		
003		<i>Xerula sp</i>			Litter on path edge	Eucalypt & lantana	Cap convex grey/fawn, viscid moist. Stipe white. Gills white attached		
004	SN	<i>Dictyopanus pusillus</i>	All		Dead tree trunk	Eucalypt verging into rainforest			
005		<i>Hymenochaete sp</i>		GE	Wood		Thin tough papery fan shaped concentric bands Collected by GE		
006		<i>Marasmius sp</i>	PL		Leaf	Eucalypt			
007	JH	<i>Russula aff pseudointegra</i>	PL	PL	Soil	Eucalypt verging into rainforest on edge of path .	Reddish cap, gills white, stipe reddiah Collected by PL		
008					Wood		White polypore with foot attachemnt		
009		<i>Laetiporus portentosus</i>	GE, SN		Fallen off		On ground in litter, bug eaten white polypoe		
010	NB	<i>Anthracophyllum archeri</i>	All		Wood		Fallen wood		
011	NB	<i>Mycena yuulongicola</i>	PL	PL	Wood		Collected by PL		
012	JH	<i>Rhodocollybia sp</i>	RB		Soil over wood		Mustard fawny floppy caps , cream rim, crowded cream adnexed to free gills; stipe darker at base		
013	GE	<i>Lenzites vespacea</i>	PL		Wood		Hexagonal pores on flat cream blob		
014		? <i>Trametes</i> ? <i>Fomes</i>			Wood		Thin bracket.: cap ridged concentric bands shades fawn/yellowy aging to brown; fine creamy pores stain sl pink		
015	PL	<i>Calocera sinensis</i>	PL		Wood				

QUEENSLAND MYCOLOGICAL SOCIETY (INC): Foray Sheet

016	NB	<i>Maramius crinisequi</i>	GE, PL, NB		Wood		Fine tangle of horse hair like fibres with 2 small white caps
017		<i>Inonotus sp</i>		PL	Wood		Thin polypore: Ridged pinky brown concentric bands pink rim; coarse cream pores. Collected by PL
018					Wood		Immature : Yellow blob with brown centre – probably <i>Stereum ostrea</i> pup
019	SN	<i>Stereum ostrea</i>	PL		Wood		
020	SN	<i>Stereum ostrea</i>	PL		Wood		Very infundibular. ?Collected by GE
021	DF	<i>Auricularia mesenterica</i>		PL	Wood		Collected by PL
022	DF		PL		Wood		Small brown cap, distant gills, eccentric stipe
023		<i>Steccherinum sp</i>	GE		Wood		Beige/fawn concentric rings; white, blunt teeth; sessile. In layers on upright tree trunk GE taken to show SFM
024	PT	<i>Scutellinia scutellata</i>	PL	PL			Orange disc rimmed with black eye lashes
025	SN	<i>Gymnopilus aff ferruginosus</i>	GE	PL & Bettye Rees	Wood	Fallen tree trunk	Cap 120 -130 up curved reddish brown; gills reddish brown; stipe 60-130mm
026	MF	<i>Cymatoderma elegans</i>	All		Wood		
027	GE	<i>Campanella tristis</i>	PL	PL			Collected by PL
