

Cooloola Foray 15/6/13

Fran Guard - Leader, Patrick Leonard, Lil Spadijer, Susan Nelles - Scribe.

No.	Species	Substrate	Assoc. organism	Spotter	Confirmed by	Notes
1	<i>Pycnoporus coccineus</i>	wood	Melaleuca	FG	FG	seen many times
2	<i>Cantharellus ochraceoravus</i>	soil	Melaleuca, Allocasuarina littoralis	FG	PL	
3	<i>Polypore</i>	dead branch	Melaleuca	SN		
4	<i>Lactarius eucalypti</i>	soil	near Euc. racemosa	FG	PL	white spored, gills cut-milky
5	<i>Psilocybe sp.</i>	dung (wallaby)		FG	PL	Rhomboid spores with a germ pore and pleurocystidia like skittles!
6	<i>Omphalina umbellifera</i>	mossy ground		PL		gills very decurrent
7	Polypore	wood		FG		bracket, large white, even rounded spores
8	<i>Dacryopinax spathularia</i>			FG	PL	yellow jelly, like p104 F out West
9	Polypore	dead wood	dead branches of dying Allocas.	SN		soft, hairy pored fungus
10	Polypore	wood	Allocas.	SN		2m up, above no 9, thick, wedge shaped
11	<i>Rhodocollybia sp.</i>			FG	PL	
12	<i>Russula neerimea</i>	soil	base of Allocas.	SN	PL	old specimen, first record this site
13	Agaric	soil		SN	FG	velvet brown cap
14	<i>Boletus ovalisporus</i>	sandy soil				mature, veil, bright mustard yellow, many rhizoids
15	<i>Entoloma (Nolanea) sp</i>	soil, Alloc. Needles				base of tree, others in sandy soil nearby, not in Gates, spore print deep pink
16	<i>Phellinus sp.</i>	wood	dead Allocas. trunk	SN	PL	2m up tree
17	<i>Ramaria sp.</i>	soil	base of Euc.			brownish colour
18	<i>Cortinarius sp.</i>	sandy soil		LS	PL	2 collected, cortina, violet gills
19	<i>Pulveroboletus ravenelli</i>	soil	Melaleuca	PL	PL	not like 14, rosy at top, slight bluing of spores when cut
20	<i>Cortinarius sublargus</i>	soil		PL	PL	area with old trees, less grass
21	<i>Phellodon melaleucus</i>	paperbark on soil	Melaleuca			toothed, blackish stem twin stipes, single, fused cap
22	<i>Clavulina cinerea ?</i>	soil	Melaleuca, grass, wallaby dung	SN		oldish, brown spongy tongues, some branched
23	<i>Hexagonia</i>	wood	Banksia branch	LS	PL	
	<i>Lactarius eucalypti</i>	soil	base of Melal. or Allocas ?	LS	PL	brown gills, subdecurrent, white spores, milk- hot taste
24	<i>Amanita grisella</i>	soil	by Allocas.	PL	FG	Grey brown, apendiculate edge, fugacious ring, white gills
25	<i>Amanita</i>	wet soil	Lophostemon conferta, Allocas.	PL		discarded, maggots
26	<i>Gymnopilus crociphyllus</i>	wood	dead Allocas.	FG	PL	on track edge. PL SN to ID with help of B Rees papers!
27	<i>Trametes modesta (atypa)</i>	wood		FG	PL	beautiful rings of colour, touch of mauve
28	<i>Amanita pallidochracea</i>	soil	under Allocas.	PL		solitary, saccate, volva, tall stipe
29	<i>Entoloma (Clitopilus) sp</i>	wood		PL	PL	PL took cluster of 3
30	<i>Inocybe australiensis</i>	sandy soil	burned Allocas.	LS	PL	taken for ASF
31	Ascomycete?	soil, Alloc. Needles		LS		Blue grey clumps
32	<i>Trametes sp.</i>	wood	dead Allocas. branch in wet soil	SN		creamy yellow colours, very small pores

Harry Springs Conservation Park

1	<i>Russula sp 4</i>	soil	with Eucalypts	LS	PL	common
2	<i>Inermesia fusispora</i>	soil		LS	PL	Ascomycete, rarely collected
3	<i>Peziza vesiculosa</i>	soil		LS	PL	Ascomycete, rarely collected, none at BRI. PL not certain of ID
4	<i>Hygrocybe graminicolor</i>	soil		LS	FG	common
