Louise Mackey of Bush Buddies brought some of their animals along to meet people. This was intended largely for local families but the heavy rains kept most away. Those of us who were there however enjoyed meeting them.

A close-up photograph of a dark, textured log covered in green moss. Several bright orange, bracket-shaped fungi are growing on the log. A small black and white scale bar is placed on the moss. The text '014' is printed in white on the black part of the scale bar, and '<- 20 mm ->' is printed in black on the white part. The text 'Fungi indet' is overlaid in white at the bottom left.
