

Chermside Hills Foray

27 February 2016

Leader : John Wrench

Scribe : James Hansen

The dry creek bed and John.
This spot has produced some interesting finds
over the last couple of years.

Coprinus sp.

Polypore

Polypore underside

Acacia disparrima
subsp. *disparrima*

Corticoid – *Perenniporia* sp.

Fistulinella poss. *mollis*

Found in a dry creek bed. The colours were much more pinkish than shown here.

Another polypore

Found on the side of the creek bed in
the leaf litter on a piece of bark.

Mycena aff. atrata

Poss. *Gyroporus* sp.

A busy group
in the
Chermside
Hills.
This photo
shows the
variety of
flora, from
Grass Trees
to Scribbly
Gums.

Symmetry

Pleurotus australis

Aleurodiscus sp.
