

Mt Cordeaux Foray Report 30 April 2011

Leader, Scribe - Susan Nelles, Ronda Warhurst Peter Warhurst Lil Spadijer Klaus Querengasser Megan Prance Aileen Wood Colleen Wood-Hall

Photographers: Peter Warhurst, Megan Prance, Klaus Querengasser

Field no	Species	Found	Field ID	Taken	Substrate, Assoc organism	Notes	Photo	further notes
1	<i>Psilocybe</i> sp.	SN	KQ		soil	small brown, saw many small brown fungi today	PW 300411 002	
2	<i>Lycoperdon perlatum</i>	PW	MP	MP to NF	soil	clump of pale brown, 4 cm tall, 3 cm wide,	PW300411 004, 20110430Q002MP3__9_7-1	
3	<i>Entoloma</i> like	LS	KQ		humus, soil	tall, gills. Mature and juvenile	PW 004,5,6	
4	<i>Stereum ostrea</i>	LS			troop- length of rotting log			
5	<i>Hygrophorus involutus</i>	PW	MP KQ		moist bark, log of dead tree	pale lemon, slightly swollen base. Field ID 'not Cypotrampa by MP & KQ', Photo ID Hygrophorus involutus by SJM McMullan-Fisher		found and photog. again on 4.5.11 by NF, MP3
6	<i>Mycena</i> sp.	SN			humus in decomposing log	pinkish brown, cap convex, 20-30		
7	<i>Trametes versicolor</i>	PW			dead logs, under ferns	predom grey , with brown/russet rings, leading edge white cream	PW 078	
8	<i>Auricularia auricula-judae</i>	LS			along log			
9	<i>Favolaschia</i> like	LS		KQ - NF	soil	2 tiny orange, deep funnel cap, globules on surface..	20110430Q009MP3__9_14	awaiting ID NF
10	<i>Mycena</i> sp.				emerging from a dead stump	small, brown; seen often today, on dead logs, mossy living trees		
11		SN				burgundy pink, dark almost black network of lines on cap	KQ	
12	<i>Cymatoderma elegans</i>	PW		MP		with an interesting serrated edge.	MP	
13	<i>Pholiota</i>	SN				small, golden/yellow, "slimy" cap, 15 mm tall. Field ID Bolbitius, SMF suggested Pholiota from photo	PW 007.8.10,11	solitary so not taken
14	<i>Marasmius</i> sp.?	SN			moist humus	tiny, white		
15	<i>Marasmius</i> sp.	PW				fine black stem, brown widely spaced gills/ rib like		
16		SN			2 cm moist twig	3 tiny brown caps, white stems		
17	<i>Hygrocybe</i> ?	LS	?	?	soil	moist cap, see BF p86 ? 118?white, cap splits apart in older specimens	KQ	
18	<i>Tetrapygos nigripes</i>	AW	MP			moist, gilled fungi mature into thin sheets		
19	<i>Morganella purpurascens</i>	MP		MP	dead log	no scales on stem or cap	PW 012	
20	Polypore	SN		SN	dead log	5mm wide stem, dark brown-black, dark hazelnut lateral attachment underneath covered by white velvety mat? - a fungal covering. On handling, fine white spores fell - like a puffball blowing.	PW 020, 021	
21	<i>Psilocybe</i> sp.			KQ		prob same as no 1. light brown cap darkening to almost black sharp point / umbo on a shallow cap. Tall, fine stem, light brown gills. Juv ones had light / whitish pileal margin		
22	Coral - <i>Clavulina</i> ?	AW	KQ	KQ	moist soil	tips pale lemon/yellow with hint of green, salmon/ apricot base on bank , side of track directly opposite to 22, light mauve. 2 lots of this one	PW 018, 019. MP 20110430Q022MP3__9_46	sent to Nigel
23	Coral <i>Clavaria</i> ?	SN	KQ	KQ	soil		PW 028	PW 026 may be decaying no 23, mauve one sent to Nigel
24	<i>Mycena</i> sp. 'red'	PW		SMF photo det.		4 small specimens	20110430Q024MP3__9_104ED, PW no 24. 300 411 048 (24)	
25	<i>Clavaria</i> ? <i>Amoena</i>	PW	KQ		soil amongst fallen logs	many seen together - single stem/ finger, tip not forked, yellow/gold.	PW 039, 041, 042 sent to NF	awaiting NF ID. see B Fuhrer p 197. PW pic 049 should have label no 25, NOT 024
26	<i>Clavulina</i> ?	KQ	KQ				PW 043	awaiting NF ID
27	<i>Clavaria</i> ? <i>albobolospora</i>	SN			soil amongst ferns, on bank	6 white "fingers" solitary stand. Tip not forked . Like BF no 301 p196	PW 050, 051	awaiting NF ID
28	<i>Polyporus badius</i>	LS			dead tree	like BF 415 P268	PW300411__058, MP - 20110430Q028MP3__9_71	
29								
30								
31	<i>Mycena</i> sp. <i>sensu lato</i>			MP			PW 071, 20110430Q031MP3__9_83	

Klaus took 6 coral specimens for Nigel Fechner
