

Brownish-pink Spores

Clitopilus – *Rhodocybe* group (rough spores)

Crepidotus (or brown)

Entoloma (angled spores)

Hebeloma (rough spores)

Lepista (rough spores)

Pluteus

Volvariella

Green spores

Chlorophyllum molybdites

Amanita (rarely)

Austropaxillus (SP rusty, clay or brown, rarely olivaceous)

Phylloporus (SP brown with olivaceous tones)

Simocybe (SP olive to green, rusty to ochre, claybrown, dark brown to purple brown)

Melanophyllum haematospermum (SP dries reddish-brown)

Cortinarius mariae (SP greenish brown)

Purplish Brown to Black

Agaricus

Coprinellus

Coprinus

Stropharia

Leratiomyces

Parasola

Panaeolus

Lacrymaria

Psathyrella

Psilocybe

White

(Amyloid, warty spores)

Lentinellus

Leucopaxillus

Melanoleuca

Lactarius

Russula

(Amyloid smooth spores)

Heimiomyces

Xeromphalina

Mycena (some)

Porpoloma

Amanita (some)

(Dextrinoid spores, smooth)

Chaetocalathus

Lepiota

Macrolepiota

Leucocoprinus

Leucoagaricus

Limacella

Chlorophyllum (not *molybdites*)

(Dextrinoid, warty/spinose spores)

Conchomyces (some)

Limacella (rarely)
